CORONER'S OFFICE. - SUICIDE. - This morning information was received by the Coroner that a suicide has been perpetrated in Liberty-street, and on going to No. 127, the boarding house of Joseph P. Peters, at the above place, he found that personage suspended by a handkerchief to his bed post. It appeared from the testimony that Mr. Peters, who has been extensively engaged in making and pre-paring Lozenges and Medicines bearing his name, on Sat-urday evening went into his room and hung himself. He had been in a desponding state of mind for some time part Verdict—"Suicine by hanging himself with a handkerchief during a fit of temporary insanity."

The Manufacture of Buttons is getting to be a great business in the United States-the imports of the article amounting last year to half a million of dollars. This branch of home labor has been commenced but recently in this country. The principal establishment is that of the Messrs Richards at Attleboro, in this State. The buttonmaking business among us has now reached the available sum of \$1,500,000 annually, and the capital invested is \$1,900,000, giving direct employment to 2580 persons. The cost of paper printing and twine to the various establishments which have sprung up is \$25,000 annually. The eldest member of the firm at Attleboro has been abroad for the purpose of examining the various modes of manufacturing the article. From the drafts of the machinery taken in his tour, to which has been added Yankee ingenuity, he has now got his works complete, and makes a better button than is sent from Europe. Thirty per cent. will protect the American manufacturer.

The Select Committee, to which was referred the annexed pedition. REPORT: CITY INTELLIGENCE. SATURDAY, Sept. 17.

position. REPORT:
That in addition to the written statements presented, the following scientific gentlemen appeared before your Combitee, and were examined by them upon the matters subscient to their consideration: Drs. Chilton, Ellet, Gale and sriscom. Your Committee have also personally inspected in process of thaing the pipes. The outmons of these tentlemen were very clearly and positively expressed; have agree in condemning the use of ordinary leaden pipes of the conveyance of water as dangeron, to health, in consequence of the birthy poisonous character of the white for the conveyence of water as dangeron, to heath, in consequence of the highly poisonous character of the winter of oxidized lead which is that produced. They candler the use of leaden pipes as most dangerous when the water is remarkably pure. Dr. Ellet states that leaden opes are used in the city of Edinburgh, where the water is secratin mineral qualities that counteract the process of sidilization. He experimented with the purest water while residing in South Carolina, and found such a tondency to ixilization as satisfied him of the diager of using leaden dises. The Croton water is very pure, and therefore the use of leaden pipes ought by all means to be avoided.

Dr. Childon recently inspected the Croton water drawn from the leaden pipes, by which it has been introduced into as leones of a well-known merchant in Pearl street in its city, and found the water evidently polluted by the

the process of a wear-known merchant in Periodret in the scity, and found the water evidently polluted by the head. All these gentlemen agree that tinning the limite of the pipes is an effectual protection. They also stated that it would be a protection, although some small portions of he lead should escape being covered—that the proximity the fin would, from certain chemical cruses, prevent or fization of the lead. It further appears that the process of uning strengthens the pipe, without diminishing its ela-

Messes Navior & Ewbank inform your Committee that by are willing to furnish the Corporation of the City with terr tinned leaden pipes, whice are thus recommended by they are willing to furnish the Corporation of the City with their tinned leaden pipes, which are thus recommended by ehemists of high repatation, at the same rate as the ordinary leaden pipes, the use of which they all unhesitatingly condemn. They would furnish them at from eight to nine cents per pound—in no case at more than nine cents per pound. From all the information obtained, and all the reflection bestowed by your Committee, upon a subject of no little importance, as connected with the heath and comfort of our citizens, your Committee have arrived at the following conclusions: That the use of the ordinary leaden pipes for the conveyance of water, particularly when as pure as the Croton, is decidedly dangerous, and therefore on it to be avoided. The danger would be less where the pipes are small in circumference and in daily use, and greater where there is more extent of surface, and they have been permitted to remain unused for any considerable space of time.—The internal coating of tin will be a secure pretection against the oxidization of the lead. The tinned leaden pipes of the petitioners are altogether superior to the ordinary leaden pipes, and deserving of public patronage.—Vour Committee therefore recommend that these timed leaden pipes he adopted for the conveyance of the Croton leaden pipes he adopted for the conveyance of the Croton leader to the ordinary text in the public buildings in preference to the ordinary text in the total contents. en pipes be adopted for the conveyance of the the public buildings, in preference to the ordina-

That the Joint Committee on the Croton Aqueduct be instructed to make use of Naylor & Ewbank's patent tinned leaden pipes for the conveyance of the Croton water into the public buildings, provided that the cost of the same shall not be greater than that of any other species of pipe which is Qually safe.

Mr. Zephenish Bosworth—Sir—I have in use one of your improved air-tight Stoves. There are, I believe, several varieties of this kind of stove in use in the country. It is not necessary that I should compare yours with others. I will only say that I prefer yours to any other which I have seen In operation and indeed to any close stove which I have cover seen. The following are among its excellencies:

I. It throws out a great amount of heat. 2. It consumes a very small quantity of fuel in proportion to the space warm d. 3. The control of the door and the damper over the draught is so entire, that you may graduate the temperature of the room, as you please. If the stove be properly managed, the air is never scorched, and no water is required on the stove. 4. It is admirably adapted to the sick room where a steady fire and even temperature is required. 5. The process of consuming the fuel used, is so slow that your room is kept moderately warm by a good size/stick of solid dry wood, from 8 to 10 bours. Hence its superio ity as a sick room stove, or for offices where you have frequent occasion to leave your fire unrenewed, for a considerable time. 6. The safety of the slove is perfect. I ought, perfect and the the lace was the store that the lace was the store that the store that the store was the store that the store that the store was the store that the store THE AMARICAN LABORER is designed to present, in a compact, cheap, readable form, and in a familiar and practical manner, the most direct and convincing facts and arguments in support and enforcement of the policy of Protecting the Industry of our own People as a measure not merely of political wisdom but of indispensable necessity. MPORTANT NEWS from Providence. -JAYNE'S EXPECTORANT TRIUMPHANT!-A Card.-1 ive the public the following facts, that all interested may

ne benefited by the operation.

I am sixty-four years of age; have been for four years seriously afflicted with the asthma, have tried several physi seriously afflicted with the asthma, have tried several physicians, and taken many "certain" cures of great expense and without any essential advantage. For two years I was not able to pass the whole of a night in my bed. On consulting Dr. Wadsworth, of this city, about my case, he advised me to take Dr. Jayne's Expectorant. This medicine operated as he told me it would do. I have taken five bottles of it, and consider myself in a manner cured by it. I can now lay comfortably all night; am free from the tightness of the tungs and weakness of the stomach, which so dreadfully distressed and reduced me. In short, life bad become fairly burdensome to me—now I enjoy it, though I am not entrely free from other infirmities are well and upon old age.

ROMAN EYE BALSAM, for Weak and Inflamed Eyes.—This Balsam is a prescription of one of the most celebrated oculists, has been a long time in use, and is confidently recommended to the public as the hest and most successful salve ever used for inflammatory hest and most successul salve ever used for inflammatory diseases of the eye. In cases where the eyelids are very much inflamed, or the ball of the eye thickly covered with blood, it operates almost like magic, and removes all appearance of disease after two or three applications.

In Dimness of sight caused by fixed attention to minute objects, or by long exposure to a strong light, and in the weakness or partial loss of sight from sickness or old age, it is a sure restorer, and should be used by all who find their eyesight failing without any apparent disease.

This Balsan has restored sight in many instances where almost TOTAL BLINDNESS, caused by excessive inflam-

One trial will convince the most incredulous of its

hope? Yours most gratefully.

Mrs. Davis, No. 77 Essex-street, has been cured of inflammation of the cyclids and weak eyes, of years' duration, by using only one jar of the Eye Balsam.

Miss Fitzgerald, No. 2 Market street, had for two or three years been so much afflicted with weak and inflamed eyes, that at times she could scarcely see to read. Her eyes have been completely restored by this Balsam, after all other means had failed. Hundreds have by its healing virtues been restored to sight, where almost total blindness, caused by excessive inflammation, had existed for years. Put up in small jars with full directions for use. W ORMS IN CHILDREN.—Of all diseases to which children are exposed, none are so fatal to them as Worms. Unfortunately, children are seldom free from them, and as they imitate the symptoms of almost every other complaint, they often produce alsoming effects without being suspected. Worms are not only a cause of disease themselves, but by their irritation aggravate all ether disease, wanteering from one part of the hady cause of disease themserves, but by their intation aggre-vate all wher diseases, wandering from one part of the body to another, winding themselves up into large balls and ob-structing the bowels, and frequently the threat, causing con-vulsions, and too often seath. The desired remedy will be structing the bowels, and frequestly the threat causing convalsions, and too often death. The desired remedy will be found in DR. JAYNE'S TONIC VERMIFUGE, which will very soon destroy the Worms, and invigorate the powers of digestion so as to prevent a return of them.

Consumption and Bad Cough—This is to certify that one bottle of Dr. Allen's Balsam of Hoarhound, Liverwort and Pleurisy Root has cured me of a severe cough, after naving tried many other remedies without the least beneat.

JAMES BACKMAN, No. 135 James st. REV. DR. JOHN SCOTT states that be has made use of Dr. Allen's Balsam of Hoarhound, Liverwortand Pleurisy Root himself, that many of his Church have also used it, some of them upparently in the last slages of consumption, with the most astonishing effect. He feels in duty bound to make this public statement, and hep's that all clergymen in visiting those laboring under consumption, will advise them to
